

A photograph of two women in a warehouse setting. The woman on the left is wearing a yellow safety vest over a black long-sleeved shirt and a white collar. She is holding a tablet and looking at the woman on the right. The woman on the right is wearing an orange safety vest over a black turtleneck and is smiling. Both vests have reflective silver stripes. In the background, there are yellow safety barriers and industrial structures. The image is partially covered by large blue abstract shapes in the lower half.

Fighting for a healthier working life

**OCCUPATIONAL HEALTH SERVICES
PRICE LIST 2026**

A healthy workplace is a joint effort.

The constantly changing working life may raise worries about change at the expense of well-being. For this reason, a working life partner must be able to solve not only the challenges of today but also anticipate those of tomorrow.

In addition to productivity losses, one sickness absence day costs the employer an average of EUR 420. Therefore, it is safe to say that health pays off.

Effective occupational healthcare is key to comprehensive working life expertise. Occupational health takes into account both symptoms and their underlying causes, prevents problems, and understands the work community as a whole. Our medical expertise and data-derived wisdom ensure that our cooperation is always based on methods supported by the latest research and multidisciplinary know-how. Our Healthy Workplace™ operating model takes into account every aspect that affects productivity and health, and with the help of modern digital tools, we can tackle what matters most in a timely manner.

Together, we create healthy workplaces that are a resource for people and build a sustainable foundation for organisational success. In our work for a healthier working life, each and every one of us is equally important.

Occupational health well-being services

To succeed at work, employees have to keep their skills up-to-date and know how to look after their well-being. Adequate rest, a well-balanced diet, stimulating physical exercise and useful tools for mental well-being form the basis for our overall health and well-being. Terveystalo's professionals help your employees to lead a healthier life and to achieve their objectives in working life. [Learn more here.](#)

Other procedures	Price
Visit fee	€17.90
Kanta fee	€3.70

Oral care services

*) Kela reimburses oral and dental examinations performed by a dentist. Reimbursement is available every other calendar year. You can be reimbursed once a year, however, if your state of health so requires.

**) Kela reimburses treatment by a dental hygienist with a referral from a private dentist. The referral is valid for two years from the date of signing, in accordance with the ordered number of visits.

If the treatment is given by a dental specialist, a 30% price increase applies when the given treatment is within the scope of the dentist's specialty.

Special out-of-hours prices apply on weekends and holidays. On Saturdays and days preceding a public holiday (Christmas Eve, New Year's Eve, Midsummer Night's Eve, etc.), the out-of-hours price can be increased by up to 20%, and on Sundays and public holidays by up to 40%.

A specific price estimate requires a personal visit with a dentist. For example, root canal therapy often requires several visits, and a specific estimate can only be given during the first appointment.

Any additional materials (e.g. prosthetic parts, dental implants, fibres, pins, etc.) and dental laboratory costs will be charged separately.

Other occupational health fees

Travel time and expenses

The prices for occupational health services and well-being at work services that are provided at the customer's premises or another location determined by the customer do not include the costs of the travel time, which shall be charged according to the hourly rates of occupational healthcare professionals (each beginning quarter of an hour), plus travel expenses according to the Travelling Regulations of the Finnish Tax Authority.

Reasonable travel expenses according to the Travelling Regulations of the Finnish Tax Authority are added to the price of all-day well-being at work services if they require travel by the coach.

*) The service is normally not an occupational health service reimbursable by Kela.

Missed appointments

Cancellations of appointments with occupational healthcare professionals and specialists must be made at least 24 hours before the time of the appointment. Cancellations of workplace and group activities must be made no later than one week in advance. The above deadlines must be adhered to unless otherwise agreed in a separate agreement. For late cancellations and missed appointments, we charge the listed price in full.

Occupational accidents and diseases

Visits related to occupational accidents or diseases shall be invoiced directly from the insurance company. If the insurance company makes a negative compensation decision, the employer shall be invoiced later.

Validity of the price list, terms and conditions

This price list is valid from 1 January 2026 until further notice.

The prices are exclusive of VAT, unless otherwise specified in writing. VAT according to the VAT Act is not added to the price of occupational health services that are considered medical and healthcare services. If taxable services or products are sold in addition to the healthcare services, VAT is added to the price. If it is later decided that a service that has been sold was taxable, the seller has the right to charge the buyer for VAT according to the applicable tax rate.

The services marked with an asterisk (*) are generally not occupational health services reimbursed by Kela.

The price list of occupational health services includes only the most common fees for occupational health professionals, laboratory and imaging tests, as well as services related to well-being at work and work ability. For example, supply costs can be charged separately for appointments and procedures. Services may be added to or removed from the price list following developments in the healthcare service sector. We reserve the right to review the prices and services, if healthcare-related regulations, regulatory decisions or research practices are changed or the cost of occupational healthcare changes significantly.
